## Migration

## **Domestic migration**

Findings in the LMIS report "Employment and its projection" show that the relationship between migration and employment is that individuals who migrated are more likely to get employed than those who never migrated.

Migration inside Rwanda (all Rwandese that ever registered to CSR)

|                  |         | Provinces of birth |          |                   |          |         |  |  |
|------------------|---------|--------------------|----------|-------------------|----------|---------|--|--|

For domestic migration Kigali city is the most attractive province.

## The East African Community

According to the new phenomenon of the East African intergration, Rwanda is likely to face more migration rates due to the concept of free movement of goods and persons.

Rwanda in this context liberalised its labour market to Proffessionals, Techinicians and Associate Proffessionals. However other countries like Kenya and Uganda liberalised their labour markets to a wider range which might lead to many Rwandans moving to those countries to compete for jobs.

It should also be noted that the Common Market Protocol stipulates that "A spouse and child who accompany a worker shall have the right to take up employment or engage in any economic activity". This clause also is a factor that might increase migration.

| All ever to CSR registered people from the | e East African Community (without Rwand | da) |
|--|---|-----|
|--|---|-----|

| Country     | Male  | Female | Total  |  |
|-------------|-------|--------|--------|--|
| Burundi     | 5,073 | 3,239  | 8,312  |  |
| Kenya       | 607   | 228    | 835    |  |
| Tanzania    | 1,358 | 540    | 1,898  |  |
| Uganda      | 7,619 | 3,540  | 11,161 |  |
| Source: CSR |       |        |        |  |

From the above table, it is indicated that Uganda has the highest number of migrants as shown by CSR statistics in the formal sector, these are followed by Burundians, Tanzanians, and finally Kenyans record the lowest number of migrants respectively. The proportion of men in general is higher than the proportion of women.

Registered employees from 2002 to today by economic sector and EAC nationality (without Rwanda)

|   | Burundi | Kenya | Tanzania | Uganda |
|---|---------|-------|----------|--------|
| Suppliers, collection & social and human ressource services | 2,685   | 347   | 765      | 4,595  |

Source: CSR

As the table above shows, Uganda is the leading supplier of foreign workers in Rwanda. The only economic sector that does not fit this pattern is "Electricity, gas and water" (with most employees from Burundi).
